

Zero Incident Mission Statement

RobWel is committed to create a zero incident environment for all our employees and sub contractors, free from recognizable and preventable hazards. The safety culture at Robwel is based upon the concept that all incidents can be prevented. Each employee must embrace our ZERO incident vision and contribute to the culture values that support prevention as a way of life. To achieve our goal of ZERO incidents, Robwel will work to provide leadership, training /education, and both incentive and enforcement to eliminate unsafe conditions and behaviours. In a ZERO incident environment, safety is value based not priority based. Safety is not competition with personal or organizational priorities. Doing something safely is recognized just as much as efficiency, quality, and productivity. In working together we can make ZERO incidents a reality.
